

RFC Series Editor Updates

IETF 103

Bangkok, Thailand

RFC Format Project Update – Primary Goals

- Project goals:
 - XML as the unchanging, underlying format
 - TXT, PDF/A-3, HTML as the outputs
 - SVG line art (black and white) allowed
 - Non-ASCII characters allowed

<http://www.rfc-editor.org/rse/format-faq>

RFC Format Project Update

- Project status and discussion
 - <https://trac.tools.ietf.org/tools/ietfdb/wiki/FormatToolsPlan>
 - <https://www.ietf.org/mailman/listinfo/xml2rfc-dev>
- Released to the RPC and the community
 - id2xml: text to v2
 - id2xml: text to v3
 - xml2rfc v2 to v3 converter
 - rfc-xmldiff
 - rfclint
 - svgcheck
 - publication formatters (TXT, HTML)
- In Progress
 - preptool
 - publication formatters (PDF A/3)

HTML Publication Format

- xml2rfc v2.12.x
 - This release introduces the vocabulary v3 html formatter. In order to invoke this formatter, use the regular --html switch for html output, and add the --v3 switch to specify the v3 html formatter.
- The v3 options, including the creation of HTML output, is now available online

RFC Editor Model (Version 2)

Abstract

The RFC Editor model described in this document divides the responsibilities for the RFC Series into three functions: the RFC Series Editor, the RFC Production Center, and the RFC Publisher. Internet Architecture Board (IAB) oversight via the RFC Series Oversight Committee (RSOC) is described, as is the relationship between the IETF Administrative Oversight Committee (IAOC) and the RSOC. This document reflects the experience gained with "RFC Editor Model (Version 1)", documented in RFC 5620, and obsoletes that document.

Status of This Memo

This document is not an Internet Standards Track specification; it is published for informational purposes.

This document is a product of the Internet Architecture Board (IAB) and represents information that the IAB has deemed valuable to provide for permanent record. Documents approved for publication by the IAB are not candidates for any level of Internet Standard; see Section 2 of RFC 7841.

Information about the current status of this document, any errata, and how to provide feedback on it may be obtained at <http://www.rfc-editor.org/info/rfc6635>.

AUTH48 Experiment - GitHub

- RFC 8446 (TLS 1.3) was published, completing the first half of the GitHub experiment
- Second half of the experiment has not yet started
- For more information on the process being followed, please see:
https://www.rfc-editor.org/rse/wiki/doku.php?id=github_auth48
- A final report on the experiment will be produced after both docs are published as RFCs

RSE and RPC Contracts

- As part of the IASA 2.0 work, the contracts for the RSE and RPC/Publisher are being reassigned from the Internet Society to the IETF LLC
