Warren Kumari

J-C. Zuniga

November 6, 2018 [mboned] @ IETF 103

draft-ietf-mboned-ieee802-mcast-problems-03

- Mostly a maintenance release
- Various editorial improvements as suggested by reviewers (many thanks!)
  - Reorganize some text so that relevant discussion is not spread out in multiple places
  - Update figures and text around citations
  - Include the first several recommendations; there should many more in the future

Next steps

- Respond to remaining reviewer comments
- Add text describing protocol specifics for IPv6 uses of multicast
- Add more recommendations
- Consider possible resolutions for discussion items in section 8
- WGLC?
