

Interface extensions YANG & VLAN sub-interface YANG Status update

draft-ietf-netmod-intf-ext-yang-06,
draft-ietf-netmod-sub-intf-vlan-model-04

Rob Wilton (Cisco)

rwilton@cisco.com

IETF 103, NETMOD WG

draft-ietf-netmod-intf-ext-yang status:

- No updates since last IETF
- I think that I'm done
- Should it wait for draft-ietf-netmod-sub-intf-vlan-model?

draft-ietf-netmod-sub-intf-vlan-model status:

- No updates since last IETF
- Still need to close L2VPN YANG model structure:
 - Affects examples only
 - They don't have an l2vpn container under the network instance
 - L2VPN model should be going to BESS WG LC soon
- Awaiting approval of model changes from IEEE 802.1Q WG
- Otherwise ready for WG LC

Any questions?
