marie@mjmontpetit.com and vincent.roca@inria.fr

IETF 103 NWCRG meeting, Nov. 5th, 2018
Current milestones

8- Mar. 2019   Draft: NC and robust tunnelling (MJM/DC/VR and others) (status: informational)
7- Nov. 2018   Draft: NC and ICN: an overview and associated research challenges (CW/HA) (status: informational)
6- Nov. 2018   Draft: NC and Congestion Control (MJM editor) (status: informational)
5- Nov. 2018   Draft: NC adoption challenges (VR/MJM) (status: informational)
4- Jul. 2018   Draft: Common coding API (VR editor, contributors ALL) (status: informational)
3- Jul. 2018   Draft: NC and satellite: an overview and associated research challenges (EL/NK) (status: informational)
2- Jul. 2018   Draft: NC and QUIC (MJM editor/IS) (status: informational)
1- Jul. 2018   Existing NC solutions (code + basic protocol if applicable) (status: informational) - 1 draft per solution: Draft: RLNC (who volunteers? VR can help), Draft: Tetrys (EL/JD) to update and adopt as RG item, Draft: DragonCast (CA) to update and adopt as RG item

dates for “RG Last Call passed” status
Proposals for each milestone (TBD)

M1 - Jul. 2018
Existing NC solutions (code + basic protocol if applicable) (status: informational) - 1 draft per solution: Draft: RLNC (who volunteers? VR can help), Draft: Tetrys (EL/JD) to update and adopt as RG item, Draft: DragonCast (CA) to update and adopt as RG item

- we are still waiting for inputs and several I-Ds
- BATS needs to be added

- proposal: discuss with respective champions and decide (abandon/re-schedule)
Proposals for each milestone (TBD)

M2- Jul. 2018
Draft: NC and QUIC (MJM editor/IS) (status: informational)

- more complex than expected since it encompasses specifications + codec/quic source code + experiments
- proposal: re-schedule for July 2019
Proposals for each milestone (TBD)

M3- Jul. 2018
Draft: NC and satellite: an overview and associated research challenges (EL/NK) (status: informational)

- we’re almost done 😊

- proposal: Dec. 2018? Authors?
Proposals for each milestone (TBD)

M4- Jul. 2018
Draft: Common coding API (VR editor, contributors ALL) (status: informational)

- heavy dependence on Hackathon project that just begun

- proposal: re-schedule to July 2019
Proposals for each milestone (TBD)

M5- Nov. 2018
Draft: NC adoption challenges (VR/MJM) (status: informational)

- in practice challenges have been distributed in several documents rather than being centralized in a single one

- proposal: give up this milestone (but not the idea)
Proposals for each milestone (TBD)

M6- Nov. 2018
Draft: NC and Congestion Control (MJM editor) (status: informational)

- status uncertain. We’re looking for a champion.
- the exact goal may have to be reformulated…

- proposal: further discuss and decide
Proposals for each milestone (TBD)

M7 - Nov. 2018
Draft: NC and ICN: an overview and associated research challenges (CW/HA) (status: informational)

- almost on time 😊

- proposal: small re-schedule. Authors, what do you think?
Proposals for each milestone (TBD)

M8- Mar. 2019
Draft: NC and robust tunnelling (MJM/DC/VR and others) (status: informational)

- idea abandoned as such, unless a new proposal/champion arrives
- proposal: remove as milestone
New milestones (TBD)

• Milestone to be added: SWiF Codec hackathon project
  ▪ proposal: July 2019, assuming “reasonable” manpower

• perhaps new milestones on active ideas presented
  ▪ FEC/NC performance evaluation
  ▪ computing in the network for NC
  ▪ proposal: wait some more and see what’s going on
