I E T F

Payload Document Status

- IESG
  - draft-ietf-payload-flexible-fec-scheme-18 was approved for publication but was withdrawn since there is an open issue. Hope to resolve this week.
  - draft-ietf-payload-tsvcis-01 – was sent for publication

Payload Document Status

- IANA registries
  - We have two registries:
    - https://www.iana.org/assignments/media-types/media-types.xhtml
    - https://www.iana.org/assignments/rtp-parameters/rtp-parameters.xhtml#rtp-parameters-2

  - They are not synchronized. Some of the payloads are only in the general media types and not in the RTP one.
    - Do we need two registries?

Payload Document Status

- WG documents
  - draft-ietf-payload-tetra-02 – the payload was registered by group from ETSI during our cycle. Waiting for authors to decide how to proceed.
  - draft-ietf-payload-rtp-jpegxs-00 – need reviews.
  - draft-ietf-payload-rtp-ttml-00 – the media subtype was registered by W3C and this document specifies the RTP payload for TTML

  VP9 RTP payload expired. Hope to get a new revision that was promised.
