

Protocol for Forwarding Policy Configuration (FPC) in DMM

draft-ietf-dmm-fpc-cpdp-12
IETF 104, Prague

Satoru Matsushima <satoru.matsushima@g.softbank.co.jp>

Lyle Bertz <lylebe551144@gmail.com>

Marco Liebsch <liebsch@neclab.eu>

Sri Gundavelli <sgundave@cisco.com>

Danny Moses <danny.moses@intel.com>

Charlie Perkins <charliep@computer.org>

Next steps: Way forward for the draft

- No changes since IETF 102.
 - Needs to be refreshed and have WG Last Call.
- Possibility to split into two drafts, in order to promote readability. Authors' opinions are divided!
 - One draft: Yang more likely to be maintained
 - Two drafts: easier to get reviewers for the functional decomposition and protocol
- Resolve comments, revise as needed.
