Note Well

This is a reminder of IETF policies in effect on various topics such as patents or code of conduct. It is only meant to point you in the right direction. Exceptions may apply. The IETF's patent policy and the definition of an IETF "contribution" and "participation" are set forth in BCP 79; please read it carefully.

As a reminder:

By participating in the IETF, you agree to follow IETF processes and policies.

If you are aware that any IETF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion.

As a participant in or attendee to any IETF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.

Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Statement.

As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam if you have questions or concerns about this.

Definitive information is in the documents listed below and other IETF BCPs. For advice, please talk to WG chairs or ADs:

BCP 9 (Internet Standards Process)
BCP 25 (Anti-Harassment Procedures)
BCP 78 (Copyright)
(Privacy Policy)

BCP 25 (Working Group processes)
BCP 54 (Code of Conduct)
BCP 79 (Patents, Participation)

KSK Futures BoF

Thursday, 0900-1030, Congress Hall 2

- IANA is collecting community input so it can decide what to do in the future with the DNS root KSK.

- BoF will be a short introduction followed by lots of mic time.

- Similar meeting happened at ICANN 64 in Kobe, and another will happen at the ICANN DNS Symposium in May.

- There is also a mailing list which allows longer discussion threads: https://mm.icann.org/mailman/listinfo/ksk-rollover

Issues Raised in the DoH Context

Karlin 1/2, Wednesday 15:00-17:00 CEST

There have been some interest and discussion about the deployment of DoH (DNS-over-HTTPS, RFC 8484) and some of its possible consequences. While it appeared in the DoH context, it may be broader.

The discussions currently take place on WG doh and dprive but could also be of interest for dnsop and HRPC
