

# Minimal TCP Convergence Layer – IETF 104

Scott Burleigh

Jet Propulsion Laboratory, California Institute of Technology

26 March 2019

# Specification status

- Changed name from Simple to Minimal.
- Establishment of TLS sessions is described in language borrowed from the TCPCL specification.
- Clarified that the encapsulated bundle is represented as a CBOR byte string of definite length, NOT as an indefinite-length byte string.
- Revised specification posted as an Internet Draft on 28 February 2019.
