Guidelines for Human Rights Protocol and Architecture Considerations

draft-irtf-hrpc-guidelines-02

Niels ten Oever and Gurshabad Grover
HRPC @ IETF104

Objectives

- Create a document for human rights guidelines (based on RFC8280)

- Practice-based

- Practice oriented

Changes from -01 to -02

- Further integration of inter-protocol and architectural concerns

- Improved text on 3.3.1. Connectivity and 3.3.19 Anonymity

- Editorial changes and corrected typos

Changes from -01 to -02

- Lots of RFCs and I-Ds in the IETF with Human Rights Considerations (https://etherpad.net/p/Overview_of_human_rights_considerationse)

- One can review considerations in problem statements, architecture of solutions, extension fields to protocols, etc.

- Changed title: "Guidelines for Human Rights Protocol Considerations" → "Guidelines for Human Rights Protocol and Architecture Considerations"

Next steps

- Thank you Corinne, Joe and Avri for reviewing the draft!

- Add more explanations to guidelines

- Does this constitute and update to (parts of) RFC 8280?

- How can we make this (more) useful for **you**?
