LISP YANG model
(-11 update)

IETF 104, Prague

Changes between -10 and -11

- Addressed Dino's comments made @ IETF103, renaming:
  - *virtual-network* to *vpn*
  - *vni* to *instance-id*
  - *ni-name* to *iid-name*
- Updated description of *instance-id* mentioning that 0 is for default VRF
- Authentication Key now aligned with RFC6833bis
  - *auth-key* is now a grouping of *auth-key-id* + *auth-algorithm-id*
  - Added *auth-key* per xTR-ID in Map-Server
- Minor editorial changes to descriptions

Next Steps

- Start WGLC?
- Need YANG Doctor review
