Edgar Ramos

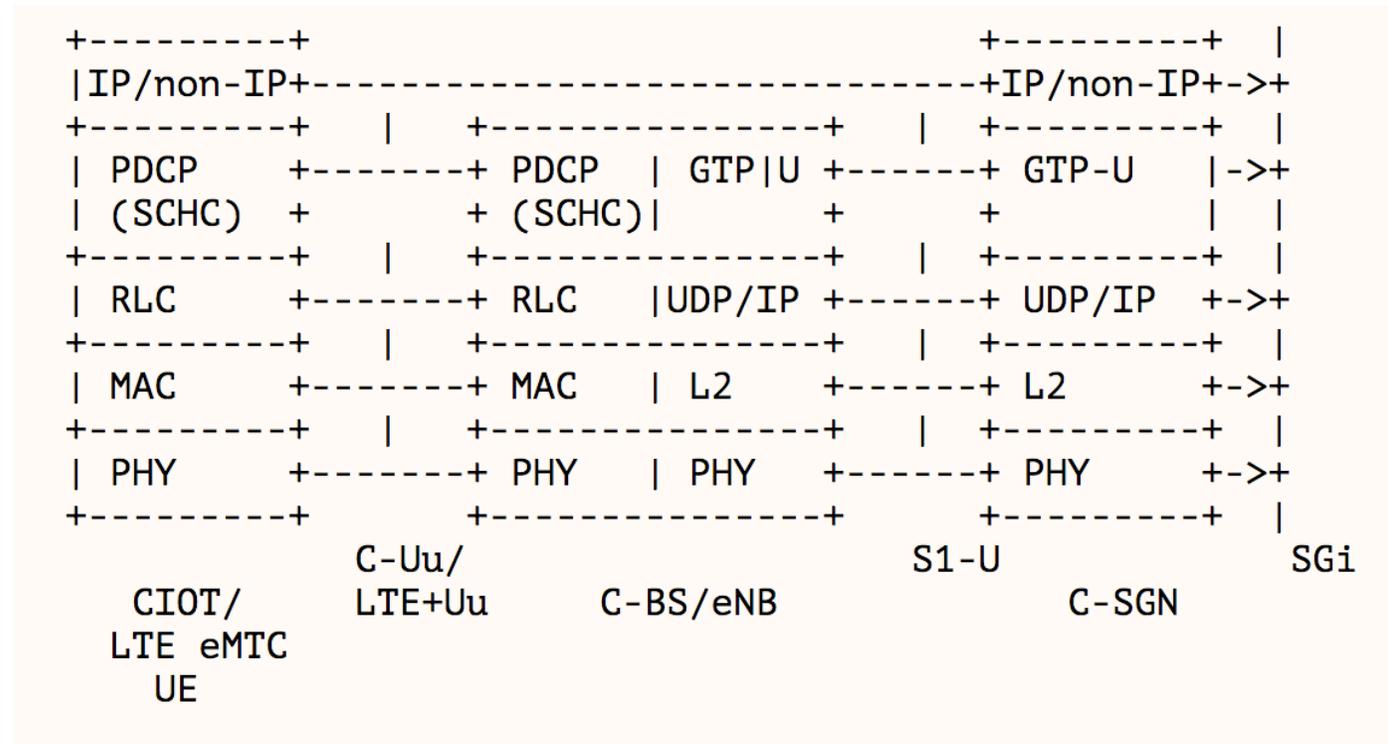

Sothy Shanmugalingam

Changes from the last version

- Define the uses cases
 - Place of SCHC entities in the architecture
 - The use of Compression and/or Fragmentation
 - When fragmentation which mode
- Rule ID depends on user subscription limitations
- Send to appendix the 3GPP information

Use Case: IP based data transmission

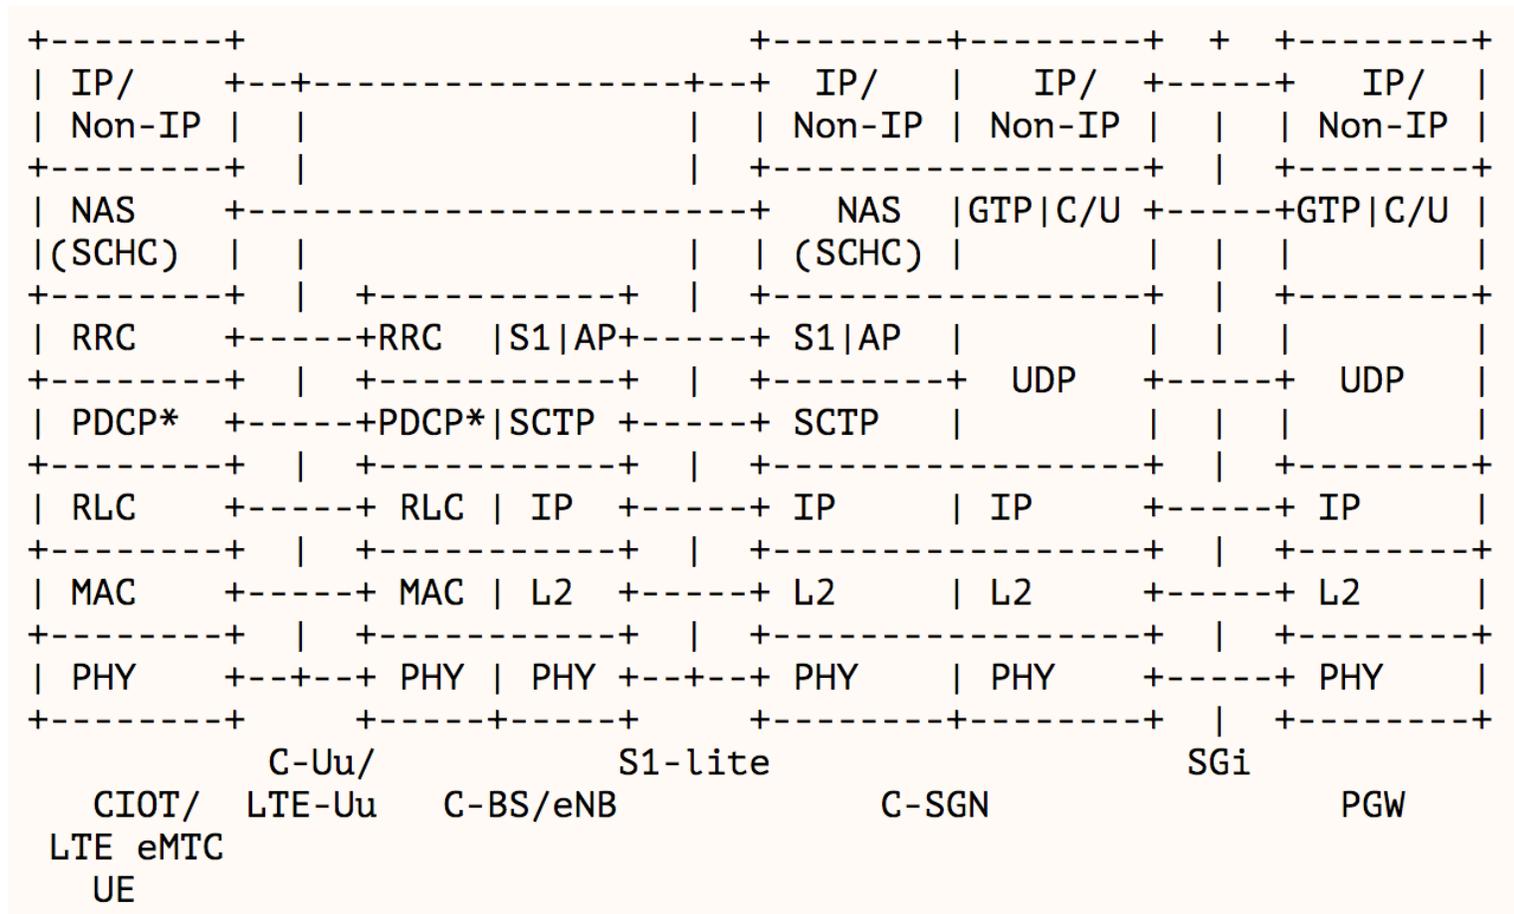

- Data over User Plane
 - Place of SCHC entities
 - Use of SCHC Compression only
 - Future: Transparent Mode
 - Fragmentation may be used

IP based data transmission

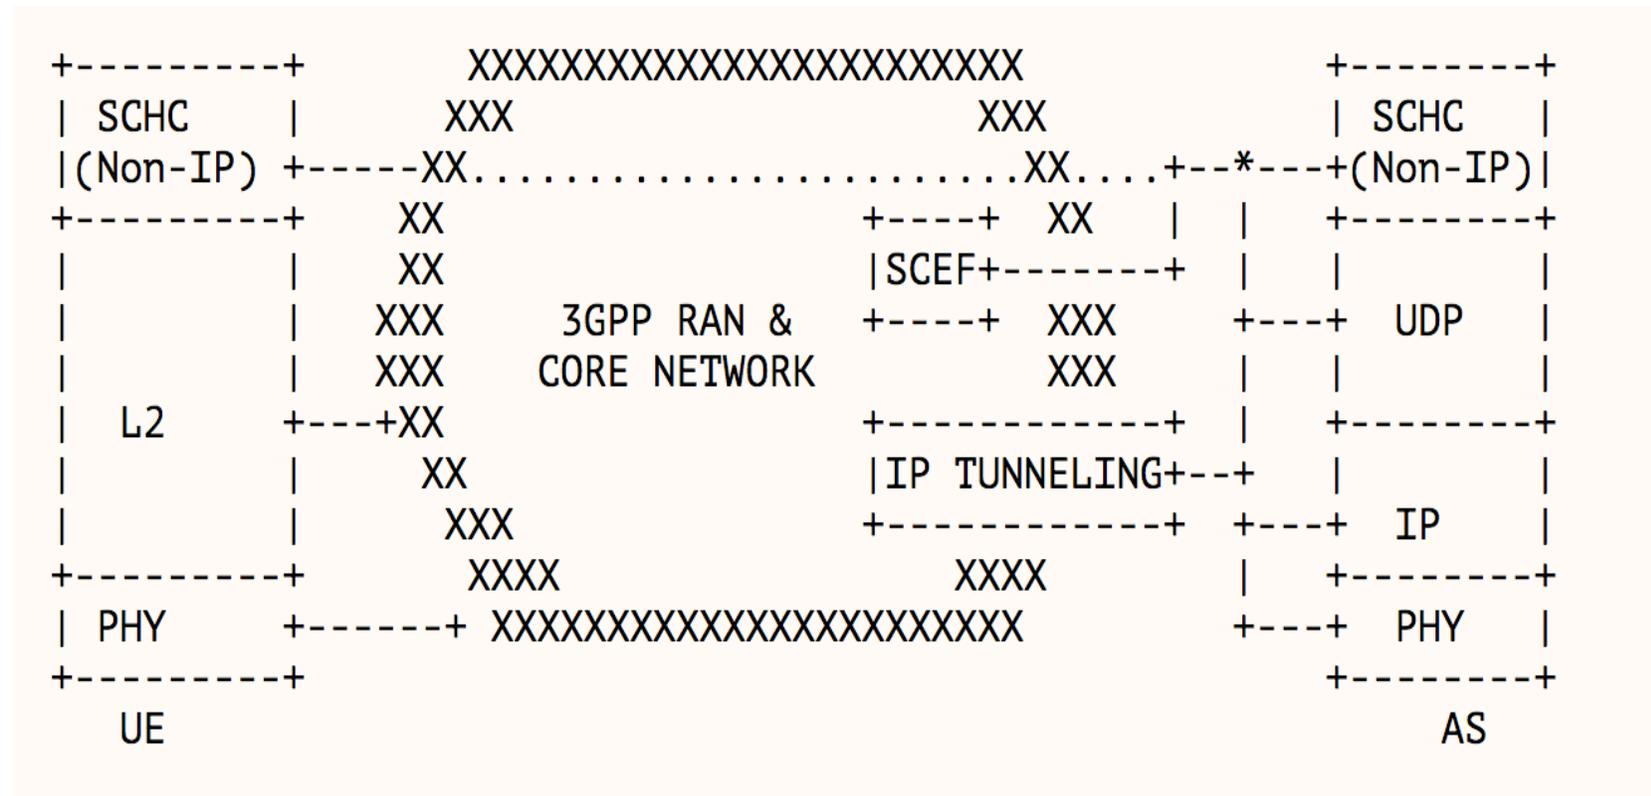

- Data over Control Plane

- IP and Non-IP data
- Place of SCHC entities
- When IP data
 - SCHC Compression
- When Non-IP
 - SCHC Compression
 - and Fragmentation

Use Case: Non-IP based data transmission

- Compressed Packets from the Application Layer
- Use of IP tunnels
- Use of Compression
- & Fragmentation

- Do we accept it as WG document?

Thank you
