IETF 104

Quick update

draft-irtf-nwcrg-network-coding-satellites-04

N. KUHN and E. LOCHIN

cnes
CENTRE NATIONAL D'ÉTUDES SPATIALES

From *-00 to *-04

- **Since last IETF : feedback from NWC RG and DTN WG**
- **Assessed Lloyd Wood's comments**
  - Precised that the draft focuses in
    - *multiple opportunities on how coding techniques could be deployed at a wider scale*
    - (rather than proposing a broad SoA of the current usage of coding in techniques in SATCOM)
  - Removed normative references
  - Updated the accronyms list
  - Some words on physical layer coding
    - *Following the taxonomy document [RFC8406], channel and link codings are gathered in the PHY layer coding and are out of the scope of this document*
- **Next steps: WGLC ?**
