Quick update

draft-irtf-nwcrn-network-coding-satellites-04

N. KUHN and E. LOCHIN
From *-00 to *-04

- Since last IETF: feedback from NWC RG and DTN WG
- Assessed Lloyd Wood’s comments
  - Precised that the draft focuses in
    - multiple opportunities on how coding techniques could be deployed at a wider scale
    - (rather than proposing a broad SoA of the current usage of coding in techniques in SATCOM)
  - Removed normative references
  - Updated the acronyms list
  - Some words on physical layer coding
    - Following the taxonomy document [RFC8406], channel and link codings are gathered in the PHY layer coding and are out of the scope of this document
- Next steps: WGLC?
