PAW - IETF 104 - Prague

# A SPAWN Wg Forming BoF in Montreal?

- PAW appears too similar to Protocol to Access White-Space (PAWS)
- We discussed on the mailing list
- In particular wanted to avoid “Deterministic” in the acronym
- So we rejected DAWN that was really cool
- And went for **SPAWN** that wraps PAW as:

⇒ **Scheduled Predictable and Available Wireless Networking**
