draft-ietf-sacm-coswid

David Waltermire

Henk Birkholz

IETF 104, Prague

March 27, 2019

Pending changes from this week

- Reduced representation complexity of the media-entry type
- Added more signature schemes from COSE
- Included a minimal required set of normative language
- Reordering of attribute name to integer label by priority according to semantics

Next steps

Remaining work:

- Creation of an IANA attribute registry to support CoSWID extension

- Fix a few references (e.g., UNSPSC)

- Address remaining feedback from Chris

- Populate CDDL changes in the I/D

Post -09 at end of week, start WGLC?
