PASSporT divert

IETF 104 (Praha) STIR WG Mar 2019

draft-ietf-stir-passport-divert-04

- A feature many people have asked about
 - How do we handle **retargeting**?
 - To header field of SIP is signed by PASSporT
 - Original SIP header value may be altered with retargeting
 - Looks like a cut-and-paste attack to the destination
- We define a special PASSporT to track retargets
 - With its own PPT "div" for "divert"
- Different from History-Info and Diversion?
 - Yes, as it is signed by the original destination domain
 - Moreover, it only captures "major" changes
 - Thanks to our canonicalization procedures

What's New in -05?

- Split into "div" and "div-o"
 - "div" for in-band, non-nested
 - Note that there can be multiple Identity headers for inband "opt" remains independent of "div"

- "div-o" for nested, probably for out-of-band

• Also really beefed up the AS and VS text

There are now detailed descriptions of how you process these objects (thanks ATIS!)

• Pretty extensive overhaul, eyes needed

An Aside: quoted PPTs

- Getting "div" through has raised consistency issues about quoting of PASSporT types
 - Should the Identity header parameter be
 - ;div=ppt or
 - ;div="ppt"
- RFC8224 not clear about this, as it says it needs to be quoted, but the ABNF has "token" with no DQUOTE
 - Probably need to errata this in RFC8224
 - Also, clarify that the info parameter value is not quoted

Issues

• Second WGLC surely necessary

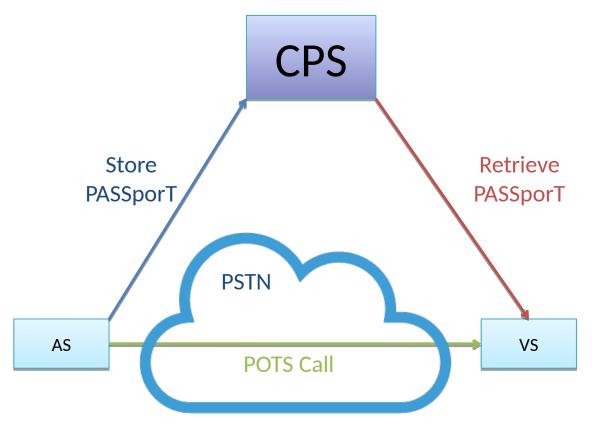

• Advance!

draft-ietf-stir-oob Out of Band

STIR WG IETF **103** Praha Mar 2019

Basic STIR Out of Band

Call Placement Service

Authentication and Verification Services are not just end-user devices

What's new in -04

- Fixed bugs left over from previous revision
 Also remedied editorial errors, thanks Robert!
- Added enterprise use case
- Aligned with new version of "div" ("div-o")
- Slight reorganization
 - Hopefully better separates solution sketch from architecture and framework

Next Steps

- Maybe a second WGLC?
 - Changes are not too drastic, cleaned up a lot of the review comments

• Declare victory
