Captive Portal API

draft-ietf-capport-api-03

Tommy Pauly & Darshak Thakore

CAPPORT
IETF 105, July 2019, Montreal

Updates
Changes in -03

Defined the Captive Portal API Keys Registry

Allows for new JSON keys and values

Changed "vendor-info-url" to "venue-info-url"

Made the user portal URL optional

Added security considerations

Open Issue

Should JSON key registration include specific guidelines for defining and labelling which organizations defined a key?

https://github.com/capport-wg/api/issues/23

Next Steps

Perform interop with portal vendors and client hosts
