

Terminology for DNS Transports and Location

draft-hoffman-dns-terminology-ter

Paul Hoffman, ICANN
IETF 105, Montréal

Small additions to *DNS Terminology*, RFC 8499

- Just terms about transports and location
 - DNS-over-TLS (DoT)
 - DNS-over-HTTPS (DoH)
 - Do53
 - Recursive DoT (RDoT)
 - Authoritative DoT (ADoT)
 - Applications Doing DNS (ADD)
- Nothing else planned

Changes from the -00

- Focused on the terms, not the abbreviations
- Got rid of “DaT” and “DaO”, replaced with Applications Doing DNS (ADD)
