Session Identifiers

FOR FAST RE-AUTHENTICATION

ALAN DEKOK IETF 105
THE PROBLEM

- EAP-Session-ID has not been defined for fast re-authentication for
  - EAP-SIM, EAP-AKA
- And no Session ID derivation was defined for:
  - EAP-AKA' (RFC 5448), PEAP
- Vendor EAP methods are likely to have the same problem, too
- Session-Id derivation is needed for ERP (RFC 6696) and FILS (IEEE 802.11ai)
THE DRAFT

- -01 has minor changes
- Updates to EAP-SIM, noting that there may be a varying number of triplets
- Seems ready for publication?
SESSION IDENTIFIERS FOR FAST REAUTHENTICATION
