A YANG Data Model for NTP
IETF 105

draft-ietf-ntp-yang-data-model-07

Nan Wu
Dhruv Dhody
Ankit Kumar Sinha
Yi Zhao
Recent Changes

• Updated references in Yang
• Updated security consideration to include handling of keys
• Use of NACM (NETCONF access control model)
• Following Yang Style guide
Next Step

• Watson asked should NTS be part of this model?
  – Authors believe that another I-D could augment the NTS feature later
  – That would be the right use of the augment feature in yang to extend the base module

• An Early Yang Doctor review is done.
  – Thanks Andy

• Ready for WG LC?
THANKS!
