

A YANG Data Model for NTP

IETF 105

draft-ietf-ntp-yang-data-model-07

Nan Wu
Dhruv Dhody
Ankit Kumar Sinha
Yi Zhao

Recent Changes

- Updated references in Yang
- Updated security consideration to include handling of keys
- Use of NACM (NETCONF access control model)
- Following Yang Style guide

Next Step

- Watson asked should NTS be part of this model?
 - Authors believe that an another I-D could augment the NTS feature later
 - That would be the right use of the augment feature in yang to extend the base module
- An Early Yang Doctor review is done.
 - Thanks Andy
- Ready for WG LC?

THANKS!
