

PIM Null Register packing

[draft-ietf-pim-null-register-packing-03](#)

Presenter: Ramakrishnan / Stig

Draft status

- Draft specifies how to pack multiple registers together in a new pim message, reducing the number of register packets.
- Before Prague IETF, the draft was changed to use the new type format specified in draft-ietf-pim-reserved-bits, and also added anycast considerations.
- No changes since last IETF.
