- **01:**
  - Changed the basic field sets from REQUIRED to OPTIONAL
    - Their implementation is considered helpful to improve RDAP interoperability
  - Removed the definition of fields included in "brief" field set
    - An RDAP provider is free to define the content of "brief" field set

- **02:**
  - Added the "Negative Answers" section
    - A request including an unsupported field set SHOULD obtain an HTTP 400 (Bad Request) response code
  - Asked IANA to register:
    - subsetting
