# Poll-Based SET Token Delivery Using HTTP
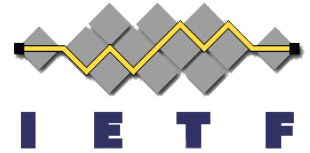

**draft-ietf-secevent-http-poll**

Michael B. Jones

IETF 105, Prague

July 23, 2019

# What is the Poll draft?

- Defines polling delivery mechanism for SETs
- Complements push delivery mechanism defined in draft-ietf-secevent-http-push

# What's happened since Prague?

- Published -03
  - Finished aligning language with that used in the Poll draft and the SET RFC

# Next Steps

- Time for Working Group Last Call?
