

IEEE 802.15.4 Information Element encapsulation of 6TiSCH Join and Enrollment Information draft-ietf-6tisch-enrollment-enhanced-beacon-06

Presenter: Diego Dujovne

Authors: Diego Dujovne and Michael Richardson

Current status

- Already passed WGLC
- Revision from IoT directorate by Carles Gomez (Thanks!)
- Version -06 includes all revisions

In the queue for version -07:

- Revision from Georgios Papadopoulos (Thanks!): Few typos and Comment on interpretation of channel or link.
- Comment from Tero Kivinen about 802.15.4 naming on Nov 16th.

Changes to -06

- General writing errors: missing punctuation, typos and expressions.
- Subsection 1.3: RA and RS usage and meaning
- Section 1: closing improved
- Section 2: Field description order changed, improved the expression on the willingness of the node to act as a Join Proxy
- Link-Local -> Link Layer, P bit usage description.
- Cited RFC8137 for the Registry IETF IE Sub-type ID.

Future

- Move to -07 after comments if there are any left
- Request reviews from IESG?
