

# ACME Client Draft

<https://www.ietf.org/id/draft-moriarty-acme-client-04.txt>

Kathleen M. Moriarty

Draft establishes additional challenge types that can be used by users with previously issued credentials.

# Changes from previous meeting

- Added 2 challenge types from Thomas Peterson's review:
  - HOTP and TOTP
- Per Tim Hollebeek's review
  - Text added on EV certificate issuance
- Removed the Device Certificate Section per Andrei Popov's review
  - This is addressed in another draft now anyway
- Addressed Deb Cooley's review
  - Removed text on identity proofing and fixed language several places of draft
  - Clarified points on use of keys (raw keys)
  - Change FIDO to W3C's WebAuthn
  - Fixed nits
