

# **GRASP Application Programming Interface**

**draft-ietf-anima-grasp-api-04**

**Brian Carpenter (editor)  
Bing Liu (editor)  
Wendong Wang  
Xiangyang Gong**

**IETF 106  
November 2019**

# Reminder: model

# Recent Changes

- Improved discussion of layering
  - Mentioned daemon
- Improved description of asynchronous operations
  - Added callbacks
- Explanation of 'ASA nonce' and 'session nonce'
- Added age limit parameter to discover()
- Clarified use of 'dry run'

# Next steps

- As a reminder, this is Informational:  
"This document is a conceptual outline of an application programming interface (API) for the Generic Autonomic Signaling Protocol (GRASP)."
- The authors believe this is ready for WG Last Call
