Recall: Draft Content and Scope

Main changes of 12 version (since IETF'105)

- 5.2.2 (Event Queue) is extended:
 - We refined Event Classes
 - 1) Network Control Event: Events Pub/Sub for control plane ASAs;
 - 2) Custom ASA Event: Events Pub/Sub for user plane ASAs.

Future Work

- Refine specific event class priority level values
- Extend GRASP APIs to support {Event Class Type: Priority}

Thank You

As one of the milestones, adopt as a WG draft?

IETF106, @Singapore
