Work Items in Existing Charter

1. Applicability Statement

- **draft-ietf-babel-applicability-10** past IESG

2. Proposed Standard RFC6126bis

- **draft-ietf-babel-rfc6126bis-16** resolving DISCUSSes

3. Address Security Needs

- **draft-ietf-babel-dtls-09** past IESG
- **draft-ietf-babel-hmac-10** resolving DISCUSS

4. Address Manageability of Babel

- **draft-ietf-babel-information-model-10** publication req'ed
- **draft-ietf-babel-yang-model-04** in WG Last Call

Work Items in Existing Charter

5. Implementation Experience

- Not required to be a document. Addressed by reports at meetings.

6. Optionally: Source Specific Routing

- [draft-ietf-babel-source-specific-05](#) publication requested

7. Optionally: Multicast

- [draft-zhang-bier-babel-extensions-02](#)

Possible New Work Items

8. ToS Specific Routing

- Expired draft-chouasne-babel-tos-specific-00

9. IEEE 802.11 mesh path selection protocol

- There are provisions in 802.11 for different path selection (routing) protocols including vendor specific path selection protocols.
- There is precedent for the IEEE 802.11 WG assigning a code point for an IETF specified path selection protocol:
 - Secure Hybrid Wireless Mesh Protocol:
<http://tools.ietf.org/html/draft-avula-shwmp-01>.

Possible New Work Items

10. more?

Next Steps

- **Highest priority has to be getting the set of 4 core drafts through the process:**
 - draft-ietf-babel-rfc6126bis
 - draft-ietf-babel-hmac
 - draft-ietf-babel-dtls
 - draft-ietf-babel-applicability
- **Discuss re-Chartering and new work items at this meeting, on the list**

END
