

BFD for Large Packets

Jeffrey Haas jhaas@juniper.net

Albert Fu afu14@bloomberg.net

A very brief update

- Working Group Last Call was requested on version -01.
- Lots of feedback prompted by that last call. Thanks in particular to Les Ginsberg.
- Points addressed in -02:
 - More operational discussion about detecting MTU mismatches.
 - Discussions on ECMP impacts.
- TBD in -03:
 - More discussion about S-BFD procedures, in particular what MTU the Reflector responds with and how that's controlled.
- Repeat WGLC after -03.
