BIER PIM SIGNALLING V8

Hooman Bidgoli, Jayant Kotalwar, Andrew Dolganow (Nokia)
Fengman Xu (Verizon)
IJsbrand Wijnands, Mankamana Mishra (Cisco)
Zhaohui Zhang (Juniper)

UPDATE

- Updated TEXT for ECMP

  - On IBBR, the EBBR Selection algorithm should ensure all signaling packets for the same C<S,G> are forwarded to the same EBBR

- PIM Signaling Join Attribute AF

  - Change text to clarify the Join Attribute AF is the arriving PIM packet AF

UPDATE

- Added Clarification for PIM-SM
  - The procedures described in this document can work with ASM as long as static RP or embedded RP for IPv6 is used.
  - Future drafts would cover BSR and more complicated SM discovery mechanism

Next Steps

- Solution considered complete
- LC?
