

TLS 1.3

AND TLS-BASED EAP TYPES

ALAN DEKOK IETF 106

MUCH DISCUSSION ALREADY

- ▶ Consensus from the WG that the approach in the document is OK
- ▶ Buy-in from Microsoft that they will implement this approach in PEAP
- ▶ Not clear what to do with FAST (maybe drop it?)
- ▶ TEAP updates may belong here (needs additional review)
- ▶ Document should be published close in time to the EAP-TLS document
