RFC Series Editor

Updates

IETF 106

Singapore
RFC Format Project Update – Primary Goals

• Project goals:
  – XML as the unchanging, underlying format
  – TXT, PDF/A-3, HTML as the outputs
  – SVG line art (black and white) allowed
  – Non-ASCII characters allowed
RFC Format Project Update

• First RFCs published in the new format!!!
• Expect several more months of debugging and increased workload as the RPC converts docs to v3
• See the RFC Editor report for more details
• Key links:

RSEME session

• Session held Tuesday morning, 19 November 2019
• Proposal: establish an open IAB program to “drive consensus around any changes to the RFC Editor model through extensive community engagement and outreach to a broad set of stakeholder communities”
• First principle: focus on doing the right thing, and figure out the process for handling outputs later
• See draft-flanagan-rseme for details on the proposal and the timeline
SLA Update

• SLA is on hold through the April 2020 in recognition of the v3 format implementation and the additional workload resulting from those changes
  – Expectation: by April 30, 2020 - RSOC will have a formal recommendation on the SLA, will have reviewed it with the RPC, and will be able to share this with the IAB
In-line Errata

• Pre-v3 RFCs annotated with *verified* errata now available

• Links to these annotated RFCs are available off the datatracker
  – Links will be available off the RFC info pages in 2020

• Annotated RFCs for v3 documents TBD
