# IOAM Specifications

- **In existence so far:** Specifications which detail aspects of IOAM:  
Data-Fields, Configuration/YANG, Export, Encapsulations
- **Missing so far:** Document that addresses IOAM deployment, tying all the different specifications together.

# Filling the gap: draft-brockners-opsawg-ioam-deployment

Document focuses on IOAM deployment, detailing how the different components relate to each other; as such not a new framework but BCP.

# Next Steps

- Good feedback received (thanks Ramesh Sivakolundu, Barak Gafni) from mailing list; to be addressed in -01
  - Expand on "Endpoint active measurement" and "IOAM active measurement using probe packets"
  - Expand IOAM Layering: What does using IOAM in a specific layer entail?
  - IOAM implementation in HW/SW: Consider expanding section 7.3.
  - Discussion of GRE encapsulation options.
- Consider WG adoption?

Thank you
