

draft-ietf-rum-rue

Brian Rosen

Media

- Audio
 - G.711 and Opus MTI
 - Don't offer Opus if gatewaying to/from PSTN
 - Anything else?
- Video
 - H.264 is the only MTI codec
 - Anything other than what WebRTC says about H.264?
- Text
 - RFC 4103 (RTP transport)

Provider vs RUE

- Text now has things like “rue MUST, providers MAY”
- I’d like to get away from that and just talk about the interface
- Discussion?

Make decisions on

- Provisioning (discover and download json file)
 - How to handle username/password
- Contacts
 - Upload/Download (file of JCard)
 - Real Time Sync (CalDAV)
- What else?
