

# Endpoint Posture Collection Profile

11/18/2019

# Status

- Updated based on WGLC feedback
  - Thank you to Henk Birkholz, Dan Ehrlich, Ira McDonald, Kathleen Moriarty, David Oliva, and Eric Voit for their thoughtful feedback
- Finally changed the name of the draft to draft-ietf-sacm-epcp

# Changes Since draft-ietf-sacm-ecp-05

- Updated the EPCP diagram to make the Posture Manager and the Endpoint the focal point
- Added support for CoSWID in the SWAM extension of the IETF NEA implementation of EPCP
- Further clarified the use of MAC addresses as an endpoint identifier

# Changes since draft-ietf-sacm-ecp-05

- Emphasized the need to consider privacy regulations when collecting and storing data
- Added a requirement stating that an endpoint SHOULD be provisioned with a machine certificate
- Made it clear that protocols and interfaces other than IETF NEA and IETF NETCONF may be supported
- Made various typographical and editorial changes

# Next Steps

- Make any other required changes
- Continue on to the IESG review process 😊
