Hackathon on "Securing the IoT"

In February 2020 will gather in Berlin to advance the work in the IETF working groups Software Updates for Internet of Things (SUIT), Trusted Execution Environment Provisioning (TEEP), and Remote ATtestation ProcedureS (RATS).

This event will give participants a unique opportunity to learn more about key IoT security technologies. We will start with a one-day tutorial followed two days of coding, coding, coding. Hardware will be provided to participants; the development environment has to be installed upfront.

When: February 17-19, 2020

Where: Berlin, Germany
