Questions:

1. Is there support to form a WG with the following charter? (That is, the charter itself is ready, as shown by community support.)
2. Does the community think that the problem statement is clear, well-scoped, solvable, and useful to solve?
3. Can I see a show of hands of folk willing to review documents (or comment on the mailing list)?
4. Who would be willing to serve as an editor for the following document(s)? (BOF chairs should take note of individuals who raise their hands, but it is also a useful gauge to see if there is a critical mass of editors to work on all the documents that are to be produced.)

5. Does the community think that given the charter revisions discussed during the BOF (subject to review and finalization on the mailing list), a WG should be formed?
6. How many people feel that a WG should not be formed? (If the number of no responses is significant, it would help to ask those saying no why they are opposed.)
7. Before asking a particular question, it is sometimes very appropriate to ask: Do people feel like they have sufficient information to answer the following question or is it premature to even ask the question?
