

# Datagram Packetization Layer Path MTU Discovery

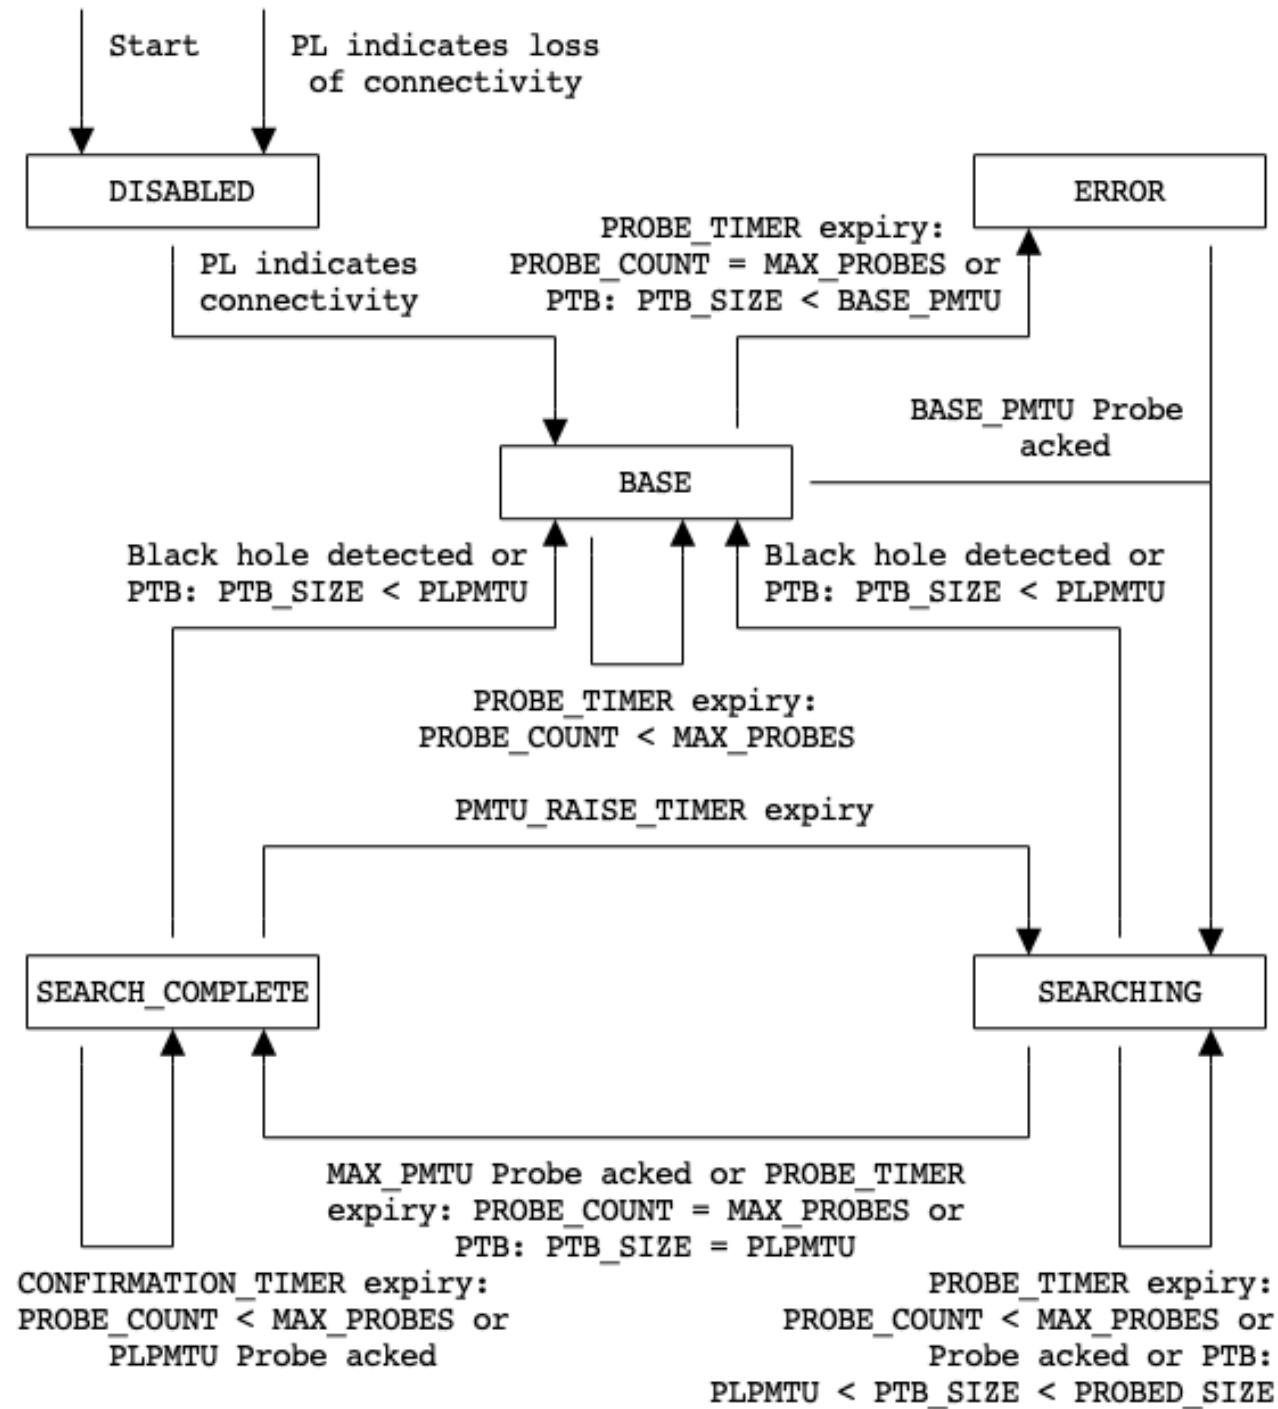

Draft-ietf-tsvwg-datagram-plpmtud-09

Gorry Fairhurst, Tom Jones,  
Michael Tüxen, Irene Rüngeler, Timo Voelker

gorry@erg.abdn.ac.uk

# **draft-ietf-tsvwg-datagram-plpmtud-08**

- Moved to xmlv3 with SVG diagrams in rich renders
- This is testing the I-D submission process
- TOC broken in some renders
- HTML (good):
  - <https://www.ietf.org/id/draft-ietf-tsvwg-datagram-plpmtud-09.html>
- HTMLised (bad):
  - <https://tools.ietf.org/html/draft-ietf-tsvwg-datagram-plpmtud-09>

# Changes since **draft-ietf-tsvwg-datagram-plpmtud-08**

- Added Initial Connectivity sections to each PL
  - PL's without a connectivity mechanism need to implement their own mechanism
- Added text to disable outgoing Network PTMU enforcement of packets
- A updated implementation with SCTP on FreeBSD has been performed by Julius Flohr

# Relationship to other documents

- Aligns with RFC4821 (which focuses on PLPMTUD for TCP)
- Normative Referenced by:
  - Use motivated in draft-ietf-intarea-frag-fragile-10 (RFC-Ed as BCP)
  - draft-ietf-quic-transport-24
  - draft-ietf-tsvwg-udp-options-08
  - draft-fairhurst-tsvwg-udp-options-dplpmtud-01
- Defines a method to realise (PL)PMTUD for SCTP:
  - RFC 4960, RFC 6951, RFC 8261

# Implementations

- Implementation for SCTP on FreeBSD
  - individual -00 (Irene)
  - Updated for -09 (Julius Flohr 2019)
- UDP Options on FreeBSD in 2018 (by Tom)
- Partial Implementations
  - MozQUIC implementation in 2018 (by Tom)
  - 3 custom UDP Protocol Implementations

We are ready for
