

COIN

Computing in the Network

Jeffrey He, Eve M. Schooler, Marie-José Montpetit
(J/E/M)

IETF 108 – Virtual

July 31st, 2020

Connectivity Hints

- **Documentation and participation**
 - Meeting material: <https://datatracker.ietf.org/rg/coinrg/meetings/>
 - Etherpad: <https://codimd.ietf.org/notes-ietf-108-coinrg>
 - Jabber: <xmpp:coinrg@jabber.ietf.org?join>
- Please remember that **all sessions are being recorded**
- Please also:
 - Ensure your **video is off and wear headphones if you can**
 - **Keep yourself muted** unless you are speaking
 - We will monitor both the **chat and the queue for questions**

Note Well – Intellectual Property

- **The IRTF follows the IETF Intellectual Property Rights (IPR) disclosure rules**
- By participating in the IRTF, you agree to follow IRTF processes and policies:
 - If you are aware that any IRTF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion
 - The IRTF expects that you file such IPR disclosures in a timely manner – in a period measured in days or weeks, not months
 - The IRTF prefers that the most liberal licensing terms possible are made available for IRTF Stream documents – see [RFC 5743](#)
 - Definitive information is in [RFC 5378](#) (Copyright) and [RFC 8179](#) (Patents, Participation), substituting IRTF for IETF, and at <https://irtf.org/policies/ipr>

Note Well – Privacy & Code of Conduct

- As a participant in, or attendee to, any IRTF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public
- Personal information that you provide to IRTF will be handled in accordance with the Privacy Policy at <https://www.ietf.org/privacy-policy/>
- As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (<https://www.ietf.org/contact/ombudsteam/>) if you have questions or concerns about this
- See [RFC 7154](#) (Code of Conduct) and [RFC 7776](#) (Anti-Harassment Procedures), which also apply to IRTF

Goals of the IRTF

- The Internet Research Task Force (IRTF) focuses on longer term research issues related to the Internet while the parallel organisation, the IETF, focuses on shorter term issues of engineering and standards making
- **The IRTF conducts research; it is not a standards development organisation**
- While the IRTF can publish informational or experimental documents in the RFC series, its primary goal is to promote development of research collaboration and teamwork in exploring research issues related to Internet protocols, applications, architecture, and technology
- See “An IRTF Primer for IETF Participants” – [RFC 7418](#)

COIN

- Our goal:
Foster research in computing in the network to improve performance for networks, applications, users
- Scope:
 - Architectures
 - Protocols
 - Real-world use cases, applications, work in progress
- Focus:
 - The core-to-edge compute continuum

Agenda (1)

- Chairs update -- 10 min
 - 1) Reminder of IPR policies
 - 2) Current drafts
 - 3) Milestones list and plans for updating / achieving
- Presentations
 - “Requirements of Computing in the Network” -- 10 mins
<https://datatracker.ietf.org/doc/draft-liu-coinrg-requirement/>
(Peng Liu, China Mobile, China)
 - “Directions for Computing in the Network” -- 10 mins
<https://datatracker.ietf.org/doc/draft-kutscher-coinrg-dir/>
(Dirk Kutscher, University of Applied Sciences Emden, Germany; Joerg Ott, TUM, Germany)
 - Data Discovery - Problem Statement, Edge, Mobility -- 20 mins
<https://tools.ietf.org/html/draft-mcbride-data-discovery-problem-statement-00>
<https://tools.ietf.org/html/draft-mcbride-edge-data-discovery-overview-04>
<https://tools.ietf.org/html/draft-defoy-coinrg-mobile-discovery-00>
(Michael McBride, Futurewei, USA; Eve M. Schooler, Intel, USA; Xavier De Foy, Interdigital, Canada)

Agenda (2)

- Presentations (continued)
 - Current Work on Industrial Use Cases, Transport, & Security -- 10 mins
<https://tools.ietf.org/html/draft-kunze-coinrg-transport-issues-01>
<https://tools.ietf.org/html/draft-fink-coin-sec-priv-00>
<https://tools.ietf.org/html/draft-kunze-coin-industrial-use-cases-02>
(Ike Kunze, Aachen University, Germany)
 - “Common Data Layer” -- 10 mins
(Marie-José Montpetit, U. Concordia Montreal Canada ; Edgar Ramos, Ericsson Finland ; Roberto Morabito, Princeton U. USA ; Eve M. Schooler, Intel USA)
- Future plans and Discussion -- 10 mins
 - 1) Research Group Items
 - 2) Interim in the Sept timeframe
 - 3) Preparation for the next IETF meeting/Hackaton
 - 4) Open discussion

Current Drafts

Document	↕ Date	↕ Status
Related Internet-Drafts (10 hits)		
draft-defoy-coinrg-mobile-discovery-00 Impact of Mobility on Discovery in COIN	2020-07-10 9 pages	I-D Exists

draft-mcbride-edge-data-discovery-overview-04 Edge Data Discovery for COIN	2020-07-13 15 pages	I-D Exists <i>Apr 2020</i>
draft-sarathchandra-coin-appcentres-02 In-Network Computing for App-Centric Micro-Services	2020-02-28 16 pages	I-D Exists

Drafts

- Drafts presented
 - draft-liu-coinrg-requirement-02: Requirement of Computing in network
 - draft-kutscher-coinrg-dir-01: Directions for Computing in the Network
 - draft-mcbride-data-discovery-problem-statement-00: Data Discovery Problem Statement (new)
 - draft-mcbride-edge-data-discovery-overview-04: Edge Data Discovery for COIN
 - draft-defoy-coinrg-mobile-discovery-00: Impact of Mobility on Discovery in COIN (new)
 - draft-kunze-coin-industrial-use-cases-02: Industrial Use Cases for In-Network Computing
 - draft-kunze-coinrg-transport-issues-01: Transport Protocol Issues of In-Network Computing Systems
 - draft-fink-coin-sec-priv-00: Enhancing Security and Privacy with In-Network Computing
- Draft not presented and needing a status update
 - draft-sarathchandra-coin-appcentres-01: In-Network Computing for App-Centric Micro-Services
 - draft-montpetit-coin-xr-03 : In Network Computing Enablers for Extended Reality
 - draft-he-coin-managed-networks-01 : In-Network Computing for Managed Networks: Use Cases and Research Challenges
 - draft-li-coin-oam-framework-00: COIN Operation, Administration and Maintenance Framework (new)
 - draft-liu-coin-differential-reservation-00: Differential Computing Resource Reservation (new)
- Drafts ready for adoption consideration?

Milestones

- Current Milestones
 - Dec 2019 Capture the SoTA of the COIN landscape - partly achieved
 - Dec 2019 Articulate COIN challenges - partly achieved
 - Apr 2020 Discuss/catalog COIN requirements and implications for network elements (including network services, network SW stacks, network HW design, etc.) – to do
 - Apr 2020 Target COIN case studies, from architecture, implementation and use case standpoints - partly achieved
 - Apr 2020 Identify COIN network-related eco-system dependencies - partly achieved
 - Nov 2020 Work toward defining a COIN scope appropriate for the IRTF, within which new architectures, mechanisms and protocols can be proposed – to do
- Updates? Suggestions for new milestones? Milestones that should be changed/deleted?

Presentations

***Advice to presenters:
Link your work to the charter and to the
cloud-to-edge continuum***

Future Plans

- **Interim Meeting in Late September**
 - Document management
 - New research topics
 - Invited talks?
- **IETF 108 Meeting and Hackathon Preparation**
 - Meeting (most likely virtual)
 - Hackathon – even if virtual?
 - Experience from last week
 - Some goals:
 - Tools development
 - Architecture evolution and multi-stream processing project
