Sieve-Mailboxid

IETF108 Madrid (virtual)
July 30 2020
Bron Gondwana <brong@fastmailteam.com>
What it does

- Adds “mailboxid” require option
- Adds “:mailboxid” parameter to fileinto
- Adds “:mailboxid” parameter to everywhere “:fcc” can be used.
Status

• Implemented in Cyrus IMAP for a couple of years, in use.
• Spec unchanged other than text clarifications in that time.
• Adoped into working group just now due to slackness on my part.
Plan

- Working group last call now – don’t think there’s anything left to add!
