Protocol (SCTP) Network Address
Translation Support
draft-ietf-tsvwg-natsupp-17.txt

Randall Stewart (randall@lakerest.net)

Michael Tüxen (tuexen@fh-muenster.de)

Irene Rüngeler (i.ruengeler@fh-muenster.de)

Status

- draft-ietf-tsvwg-natsupp-17.txt:
 - Address Maksim’s remaining comments. The NAT function is not required anymore to send SCTP packets (but ICMP).
 - Address Mohamed’s first round of comments
 - Replace NAT device (RFC 2663, RFC 4787) by NAT function (RFC 6888).
 - Terminology change: Internal Address/Port/Vtag, Remote Address/Port/Vtag and External Address

ToDo

- Address Mohamed's second round of comments:
 - IP reassembly not required. A NAT function only must be able to handle them.
 - Some clarifications regarding IP reassembly
