

# iCalendar Series

Mike Douglass November 17 2020

# Master Components

- Adding VEVENT-SERIES, VTODO-SERIES components.
- Generated components will start with one with same start/duration as master - unless excluded.
- Aids backwards compatibility - new component ignored by old clients.

# SRULE v RRULE

- Stay with SRULE
- Adds no complexity - just a new property but has different parameters
- For those who want the ability to create multiple recurrences it makes it available.

# New draft soon

- Working on it
- Hope to implement soon.

# Eventpub

Mike Douglass November 17 2020

# Addressed comments

- Waiting response?
- Further message from Dilyan...

# Location as component

- Some concern about STRUCTURED-LOCATION with reference to card
- Make it a component with one or more STRUCTURED-DATA properties.
- Can have an encoded copy of a vcard
- Avoids duplicating vcard properties in location but
- does allow all card fields to be exposed.
- VCARD has SOURCE property to refer to original.

# Subscription Upgrade

Mike Douglass November 17 2020

# Making minor textual changes

- Emphasise reduction in network traffic - benefit to mobile devices.
-

# Vpoll

Mike Douglass November 17 2020

# Little movement since last call.

- Needs some work on iTip and checking over after move to participant.
- Working on updating implementation
