Updates

• OTSi/OCh related description is deleted, as they are not in the scope of this draft.
• How to apply GMPLS to ODUcn case is out of the scope of this draft, relevant description is pruned out.
• Adding some description that the G.709-2020 version does not have impact on the extension indicated in this draft.
• Adding some description that the M value of OTUCn-M may not be efficient for deciding which slots are available or not.
Next steps

• WG LC
