

IMAP QUOTA extension

draft-ietf-extra-quota-03.txt

Alexey Melnikov <alexey.melnikov@isode.com>

Goals/History

- Revision of RFC 2087
- Based on an earlier draft co-edited with Dave Cridland

Changes done in WG -03 since -02

- Only require "DELETED" status item be implemented when QUOTA-RES=MESSAGE capability is advertised
- Similarly, only require "DELETED-STORAGE" status item be implemented when QUOTA-RES=STORAGE capability is advertised

Open Issue

- “OVERQUOTA SP tag” syntactic issue
- IMAP response codes (and parameters) are not allowed to contain “]”.
- drop “SP tag” or update IMAP4rev2 to disallow “]” in IMAP command tags?

Future directions

- Is anything missing from the document?
- Should anything be simplified/removed?

Next steps

- Ready for WGLC
