What to do with [qlog]?

draft-marx-qlog-main-schema-02

draft-marx-qlog-event-definitions-quic-h3-02

Robin Marx
Structured endpoint logging

1. Full internal endpoint state (e.g., cwnd)
2. Privacy
3. Tooling and analysis

https://github.com/quiclog/internet-drafts
> 70% of QUIC implementations have (partial) support:
- aioquic
- quic-go
- quiche
- mvfst
- picoquic
- haskell
- ngtcp2
- ...

Others do something similar:
- msquic
- google quiche

@rmars we currently have qlog enabled in prod with similar amounts of events being recorded a day as I quoted before (dozens of billions).
Still just 2 personal drafts, small core team

Now needs additional discussion
Options:

1. Do nothing
2. Interim / design team
3. Adopt in QUIC wg
4. Adopt in other wg / BOF

Should I stay or should I go now?
