

RAW use cases

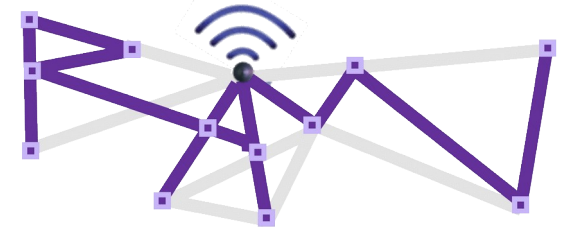

draft-ietf-raw-use-cases-00

Presenter: Carlos J. Bernardos

Authors: G. Papadopoulos, P. Thubert, F. Theoleyre, CJ. Bernardos

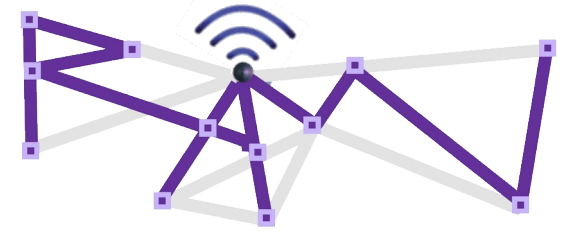

Use cases in the draft

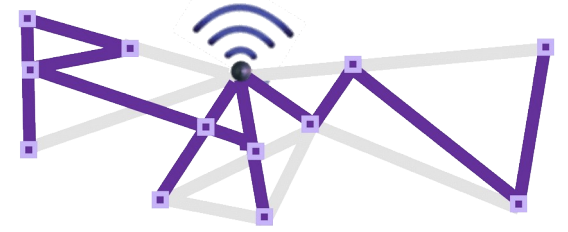

- Aeronautical Communications
- Amusement Parks
- Wireless for Industrial Applications
- Pro Audio and Video
- Wireless gaming
- UAV platooning and control
- Edge Robotics control
- Emergencies: Instrumented emergency vehicle

Use case structure

- Use Case Description
- Specifics
- Challenges
- The Need for Wireless
- Requirements for RAW

Summary and next steps

- 8 use cases already included in the draft
- It's a WG document, we need input from you:
 - Are the use cases relevant and representative?
 - Is there any use case missing?
 - Is the structure used to document the use cases appropriate?
 - How should we continue working in the characterization of use cases in terms of requirements to help the WG achieve its milestones?
 - Should we collaborate with draft-ietf-raw-architecture?
