

RPL Unaware Leaves

draft-ietf-roll-unaware-leaves

Pascal Thubert

IETF 109

ROLL Virtual Meeting

Status to the draft

- Moved from 18 to 23 since last IETF
 - Mostly Alvaro's A-D review
- Updates + 6775 – NPDAO
 - Reformats the RPL status (but NPDAO defines status 1)
 - Add ROVR to the RPL Target Option
- Restructured / Reordered sections
 - RUL requirements
- Submitted to IEFT last call

Major changes

- Alignment with use of RPL Info
 - MOP 7 update inherited
 - Define “Root Proxies EDAR/EDAC” ‘P’ flag
 - Define default behavior of ‘P’ flag (on) for MOP 7
 - Encapsulation for external routes
 - RPI rewriting at the 6LR
 - Section 3 “RPL External Routes and Dataplane Artifacts”
