SUIT Architecture IESG Evaluation

- A few nits related to clarification that requirements in the architecture often apply to the serialization format, not the implementation (e.g. confidentiality protection)
  - Clarity over which elements of the architecture are REQUIRED
  - Clarity over which requirements the architecture places on the serialization
- Grammar/clarity nits
- Should any I-D references be normative?
  - I-D.ietf-suit-information-model
  - I-D.ietf-teep-architecture
  - I-D.ietf-suit-manifest
  - I-D.ietf-rats-architecture
