

Benchmarking Methodology for Network Security Device Performance

Highlights of changes

- Over 70 comments and suggestions received
- Significant number were clarifications and grammatical changes
- Changed target of draft from Next Generation Firewalls to Network Security Devices
- This draft supersedes RFC 3511
- Under test bed setup (section 4) referenced section 3 of RFC 6815
- Clarified security features definitions contained in Section 4.2, Table 3
- Significant rewrite of Section 6.3 – Benchmarks and KPIs – goal to clarify and eliminate any ambiguities - used RFC 2647 definitions where applicable

Highlights of changes

- Test cases 7.1 through 7.9 intent unchanged
 - Any changes made were for clarity
- Added verbiage to section 8 – IANA Considerations
- Added RFCs 2544, 4733 and 6815 to section 12.2 – Informative References
- Added Appendix B – DUT/SUT Classification
 - Previously in section 4 – moved as per suggestion

Thank you!!!

- Thank you to all from the BMWG that took the time to review
- This was a significant effort by a lot of people
- Your input was very helpful

- Next steps??
